

January 30, 2008

I am writing this letter as an introduction. I am Doug Newton; I have taken over as Managing Director of Team Aviation. Team Aviation was doing business in Huntsville, Alabama, formally, as TVAP. Team Aviation is now located in Las Cruces, NM. I can be contacted via telephone at 575-525-0500, by email at newt727@aol.com, or fax 575-541-8821.

You have received this letter because in the past you have purchased a BD-4 Aircraft kit from Team Aviation or TVAP. I am reconstructing the Team Aviation and TVAP records in order to meet those obligations. It is the hopes of all of us at Team Aviation that we can help see your BD-4 project through to completion. We would appreciate a note giving the status of your project and instruction how we can help.

We have moved most of the equipment plans and parts to Las Cruces. Several weeks have been spent trying to figure out what we have in supply and twice as much effort in figuring out what we do not have. Rebuilding the supply lines has required a great deal of time and effort.

We still have at least one more truckload to bring to New Mexico. New parts have been ordered from tail sections and are ready to be shipped to New Mexico. The greatest shortage at this time appears to be in the control system parts. A company has been contacted to manufacture these parts.

Along with our efforts to establish a complete inventory of BD-4 parts we are committed to a customer oriented shop. Jigs for wings and stabilators are being manufactured for those builders wishing to use the facilities for quick construction of these components under a builder supervision program. This will be a great way to get these components constructed quickly.

Team Aviation has one airplane undergoing flight evaluation and two aircrafts (one with nose landing gear and one with conventional landing gear) under construction. These airplanes will be based in Las Cruces for flight evaluation, testing and flight training.

Team Aviation, Adventure Aviation, with assistance from EAA Charter 555 will be hosting a Bede Fly in May 16th, 17th, and 18th of 2008. The Team Aviation website can be contacted at www.teamaviation.us for the updates concerning this event. This fly-

**8960 Zia Blvd. Suite 16
Las Cruces, NM 88007**

in commemorates forty years of BD-4. Mementos of this occasion will be given to those attending. We hope you will save the date for this inaugural event.

We at Team Aviation pledge to continue working towards providing you with the parts needed for completion of your project. Again, please help me reconstruct a needed part list by sending me a list of items you are expecting from Team Aviation to complete your kit.

Sincerely,

Doug Newton
Managing Director
